**Placentia, California, October 20th 2014** - Today CalDigit, the company of choice for the content creation industry, announces that the T3 Thunderbolt™ 2 RAID storage solution is available for pre-order now and will be shipping from October 24th. The brand new version of the T3 now features Thunderbolt™ 2 technology, and a higher storage capacity of 15TB. The T3 supports RAID 0, 1 & JBOD configurations and includes a brand new industry leading 5 year warranty. CalDigit is also giving away a free AV Pro drive reader with pre-orders of the 9TB, 12TB or 15TB models of the T3.

## **T3 - THE POWER OF 555.**

### **UNDER \$500 | OVER 500MB/s | 5 YEAR WARRANTY**

The new T3 is the most affordable yet powerful, and feature-packed RAID 0, 1 & JBOD storage device available. Starting at under \$500, with performance over 500MB/s, and a 5 year warranty, the T3 sets a new benchmark for professional RAID storage.

"The value and volume of features that the new T3 with Thunderbolt™ 2 offers goes beyond what is currently available on the market. The 5 year warranty proves how much CalDigit believes in the reliability and build quality of the T3", said Kosta Panagos, Director of Marketing at CalDigit.

Traditional RAID storage solutions offer a 1-3 year warranty. CalDigit is leading the way with a 5 year warranty that is also backed by CalDigit's industry renowned technical support.

CalDigit's products have always offered the best performance in the industry. The new T3 is no exception to this rule. When used with SSDs it can achieve speeds of 1100MB/s, and with 3.5" HDDs installed the T3 can achieve speeds of 580MB/s. The T3's 3-bay design allows the device to achieve significantly faster performance than traditional 2-bay storage devices. The 3-bay design also allows for higher storage capacities of up to 15TB with 3.5" HDDs installed. Traditional RAID 0, 1 & JBOD devices, that are deigned in the 2-bay style, have lower storage capacities than the T3.

## **4K REVOLUTION**

CalDigit's investment in Thunderbolt™ 2 has ushered in a new era of 4K capable devices, allowing professional users to integrate a powerful 4K workflow. The dual Thunderbolt™ 2 ports on the T3 allow users to connect a 4K monitor as part of the daisy-chain, with ease and simplicity.

The CalDigit T3 is built from the ground up for professional users, not only to meet the demands of 4K post-production but also exceed them.

“Thunderbolt™ 2 gives professional users the performance they need for working with high-resolution uncompressed 4K video formats, and the T3's data transfer performance means working with 4K files has never been easier”, said Kosta Panagos, Director of Marketing at CalDigit.

## **PRICE & AVAILABILITY**

The CalDigit T3 with Thunderbolt™ 2 is available to pre-order now from the CalDigit Online Stores. Pricing for the T3 starts at \$499 MSRP in the US, £370.80 (inc. VAT) RRP in the UK, and €478.80 (inc. VAT) RRP in Europe for the 1.5TB HDD model.

### **About CalDigit ([www.caldigit.com](http://www.caldigit.com))**

CalDigit is vertically integrated in designing, building, and assembling all of our products. Our impeccable attention to detail resulted in the ability to provide users with unparalleled support. We use only the best quality components delivering solid and durable products which has made us the company of choice for the content creation industry.
